

Take Advantage of This Opportunity and Join Our Team as

## **Production and Maintenance Engineer (m/f)**

EHE is a branch of Interenergo, an international energy company and part of the Austrian Kelag Group. We are committed to operating and maintaining hydropower plants while actively contributing to the development of new renewable energy projects across the region. EHE plays a crucial role in business support functions, fostering a strong connection with Interenergo's headquarters in Ljubljana. Through efficient power plant management and innovative technical solutions, we ensure the reliable and sustainable production of green energy, contributing to a cleaner future.

**Take the next step in your career and join the EHE team as an Production and Maintenance Engineer.**

**We are looking for an experienced professional to support our operations and engineering team at EHE Banja Luka.**

The operations and engineering team ensures the smooth operation of our production units, and construction of projects in Southeast Europe. This position offers career development in an international environment on diverse and exciting engineering projects in the energy field.

**If you thrive on optimizing operations, streamlining processes, and ensuring seamless operation of power plants to achieve production targets and maintain the highest quality standards, then this position is right for you!**

### **Your responsibilities**

- Organizing the technical management of power plants in Bosnia and Herzegovina.
- Continuous monitoring of plant operations and parameters, including all associated activities (start, stop, generator engagement, faults, outages, etc.).
- Inspection of production facilities and grid connections, identifying technical deficiencies and malfunctions, taking necessary actions for issue recognition and resolution, and preparing reports.
- Participation and provision of technical support during project development and construction phases.
- Monitoring and ensuring key performance indicators are met: equipment availability, system efficiency, actual vs. planned costs.
- Consulting and implementing new standards, processes, and tools in Engineering and Operations & Maintenance (O&M) at the Interenergo Group level.

### Your key attributes and qualifications

- VI. or VII. level of education in electrical engineering, energy, or related technical fields.
- Previous work experience in the energy sector, with desired experience in one of the following areas: design or engineering, operations, and/or maintenance of energy facilities.
- Willingness to work in the field and undertake business trips (Adriatic region)
- Knowledge of technical standards and regulations in the energy sector.
- Category B driving license.
- Business proficiency in English, Bosnian language.

### Why join us

- An established company part of Austrian Kelag group, with strong ties across 7 markets in South-eastern Europe.
- An international work environment that fosters personal and professional growth.
- Exposure to various technologies across all life cycles of production units (from development to operation).
- Comprehensive on-boarding and rotation process.
- Open communication and collaboration.
- Emphasis on ongoing learning and personal growth through allocated budget for training initiatives, conferences and language courses.
- Internal recreational program.
- Option to use the Group's holiday accommodations in Carinthia, Austria.

**We Are Expanding Our Team!** If you do not see yourself in the described responsibilities and experiences but have relevant experience and a strong desire to develop your career at Interenergo, we want to meet you.

We invite you to send us your applications with the attached CV no later than **31.03.2025** by e-mail to: **info@interenergo.si** or by regular mail to: **Interenergo, d.o.o., Gosposvetska cesta 11, 1000 Ljubljana.**
